Elmsford, NY – February 28, 2017 – Planet Data, a global innovator in the creation and development of patented eDiscovery technologies, services and solutions, proudly announces that it has earned kCura's Relativity Best in Service designation for 2017.

This certification recognizes Relativity Authorized Partners who provide an exceptional Relativity experience for end users. This acknowledgement is exemplary of Planet Data's mission to provide the ultimate eDiscovery experience to its client.

"We are extremely proud to again receive this designation," said Debra Mangum, Vice President of Hosting Services for Planet Data. "The continued recognition of Planet Data expertise and service by kCura and our clients is a direct result of our commitment to quality work and exceptional customer service. We remain focused, and will continue to strive for this level of excellence."

Through a voluntary audit, Relativity Best in Service partners demonstrate their expertise and experience hosting projects in Relativity. kCura evaluates these partners' individual data centers in three areas: technical infrastructure, customer service, and product expertise. Additionally, Best in Service partners meet a set of requirements for duration as a hosting partner, size of Relativity installations, and core Relativity certifications.

"Earning Relativity Best in Service status requires a lot of dedication," said George Orr, vice president of customer success and support at kCura. "It proves that Planet Data has deep product expertise that's backed up by a commitment to excellent customer service."
